

MY HOME TOWN

The place where I was born is called "EZARO" and it has 1,066 inhabitants, it is situated in the north of Spain. It has two beaches, a place for boats and a mountain, in my place the people have fields where they have potatoes, onions and that the things they have to eat and in their houses they have animals like pigs, chickens, horses and they kill them to have the food. It does not have a football team because the young people had left to the city, it has a waterfall which it mixes with the sea and it is really nice. Normally I go to my place once a year but it was a bit expensive but now is cheap with Ryanair, that's why I went this summer two months and I had a good time. In this map you can see my place that is called "EZARO". The nearest city to my village is called "LA CORUÑA", which is at 200 KM approximately the beach is quite big and really good.

This is how my village looks like from the top, as you can see it is not too big but is a very relaxing place with no pollution and no noise that you can normally hear in a city. As you can see there are two beaches which in summer are full of people. In winter there is not many people because they go to

the city to work, in winter it is a bit cold but not that much as in England. There is only one bar and one supermarket, and one nursery.

There is a waterfall that you can see in the picture if you see it in real life it is amazing. In the summer because it does not rain the people are allowed to swim there.

SO IF YOU FANCY COMING JUST DO IT!!!!!!
